

Feature Title	Agreed Priority
createRulesetModelDescription Utility - Phase 3	3 - High
Enhance Sizing and HVAC Simulation for Spaces	3 - High
Multi-speed Fan for VRF Indoor Terminal Units	3 - High
Air-to-water heat pump with heat recovery mode	3 - High
Variable speed fan powered terminal units	3 - High
Features related to Decarbonization	3 - High
Variable airflow exhaust heat recovery	3 - High
Improvements to SZVAV control and improvements to OA modeling in terminal device.	2- Medium
Add Supplemental Heating Coil to AirloopHVAC:UnitaryHeatCool:VAVChangeoverBypass object	2 - Medium
Simpler input for modeling piping distribution losses	2 - Medium
Size Heating coil based on mixed air and heat recovery entering temperature	1 - Low
Modeling Thermal Bridging in EnergyPlus	1 - Low
Continued Improvement of the Earth Tube Model in EnergyPlus	1 - Low
EnergyPlus Object Curves	1 - Low
PCM modeling	1 - Low
PCM Hysteresis Model Physics Update	1 - Low
Documentation available settings for compound AirLoopHVAC:UnitarySystem	1 - Low
Finite Difference Solution Method for Green Roof Model	1 - Low
Improve DetermineShadowingCombinations Non-convex Surface Warning	1 - Low
Export data in older formats	1 - Low
Chiller Refrigerant Migration free cooling	0 - Combined
Advanced heat pump modeling capabilities	0 - Combined
Time-Independent Energy Recovery System	0 - Combined
Improve VRF Coil Sizing	0 - Combined
